

Representative Learned Wavelet Basis Functions Across Scales (WavKAN Layer 1)

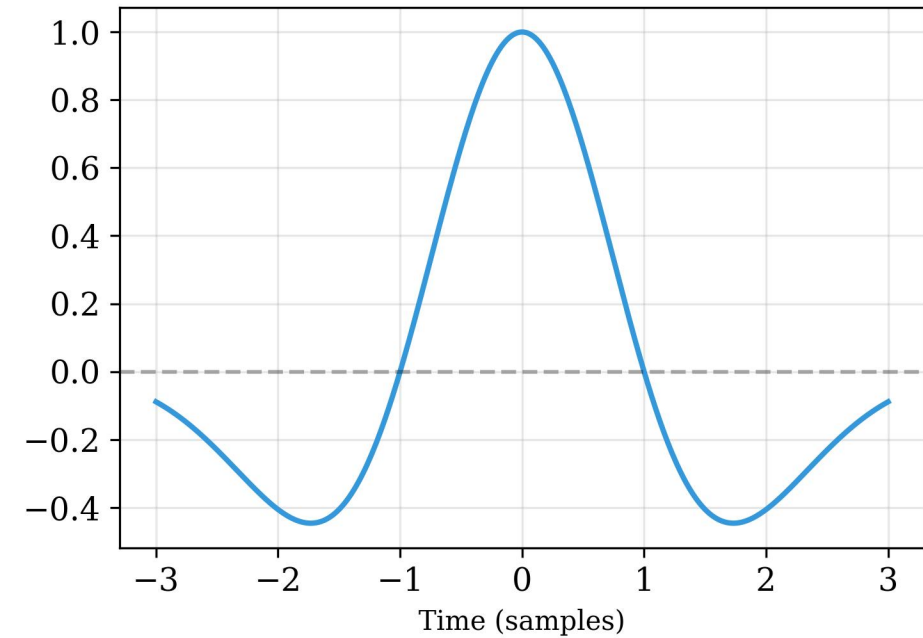

Scale = 0.5
(High-frequency, localized)

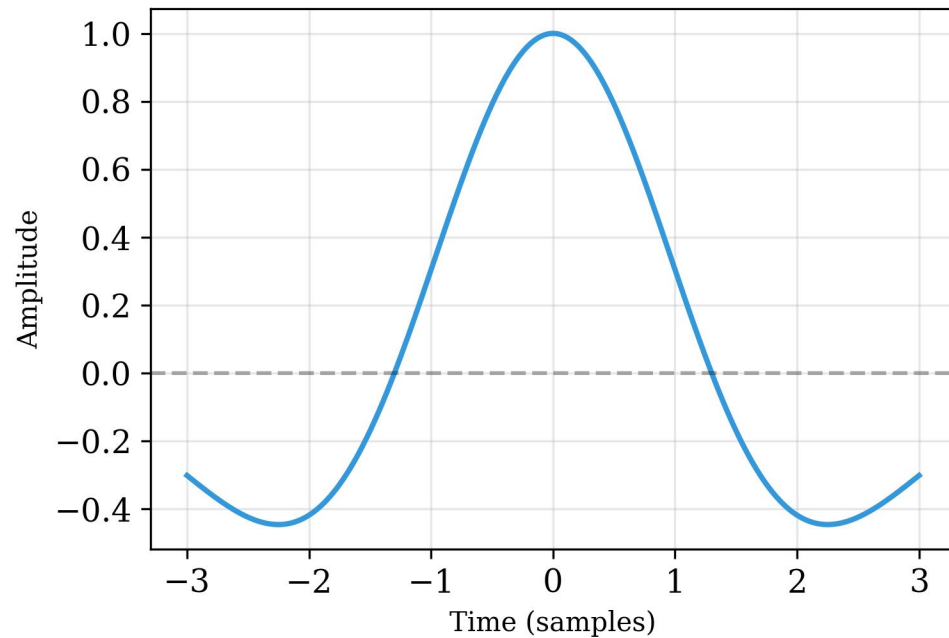

Scale = 0.8

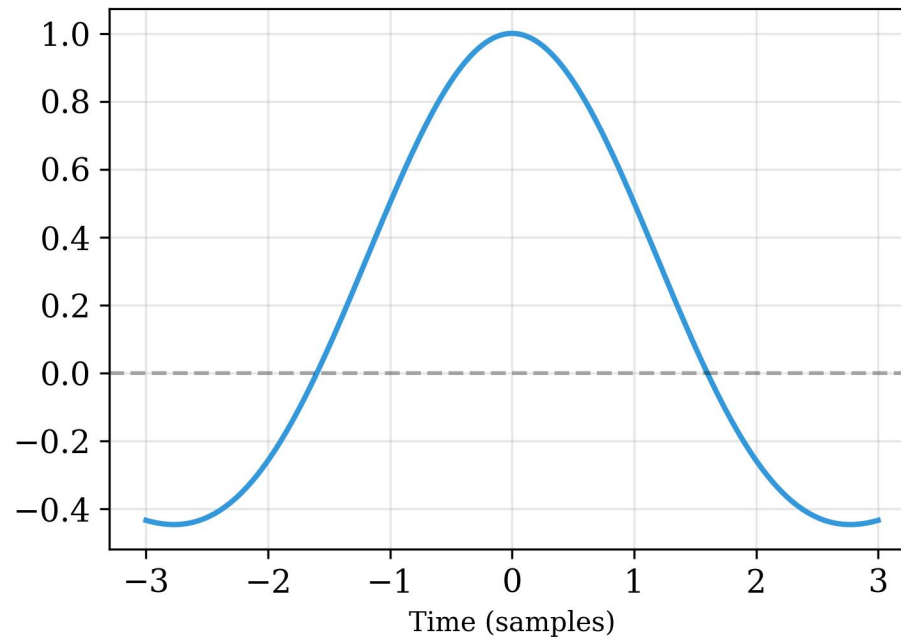

Scale = 1.0

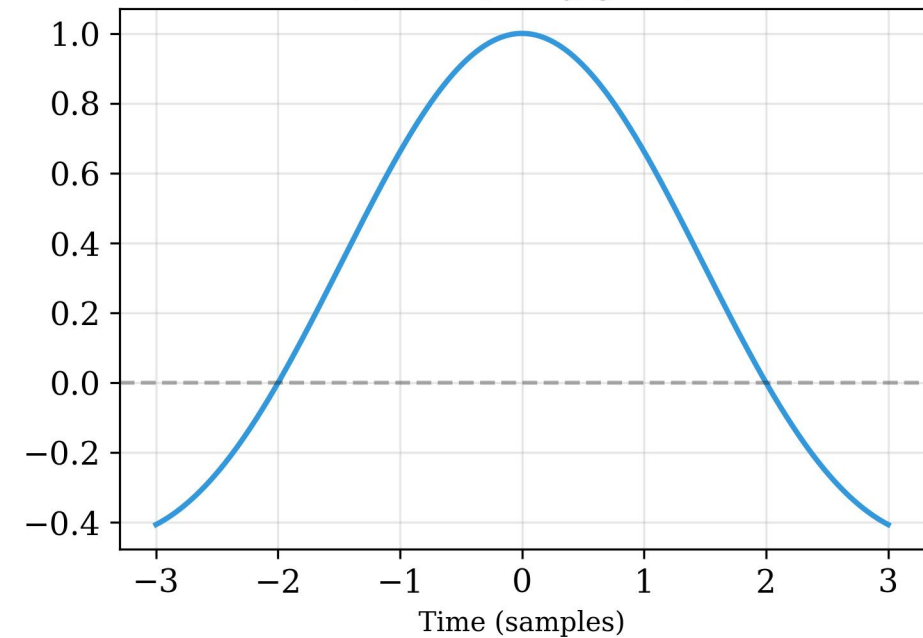

Scale = 1.3

Scale = 1.6

Scale = 2.0
(Low-frequency, global)

Increasing Scale →

Shown wavelets are representative filters from a single trained model (Seed 42). Smaller scales emphasize localized, high-frequency morphology, while larger scales capture broader temporal structure.
